Abstract:

This article investigates "effects of personal and community security on library customization in Kashim Ibrahim Library of Ahmadu Bello University. Zaria the paper explore the naturalistic habitat on personal and community security through conceptual and theoretical perspective, this research paper adopted symbolic violence theory as a lens to study the population which comprises of group of undergraduate to post graduate students that covered the sample size of twelve only (12). The methods adopted are purely qualitative approach using stratified interview as the only instrument for data collection. Objectives of this research has identified the types of personal and community security that are personalized by the responded, the result of the findings was that customers /users of the library have generated several ways of security protection. Finally, the research has emphasize the need to explore more and advance strategies for effective security in the library.
